

PARALLELAGON

PARALLEL AC and DC PUMPS SYSTEM

PARV-1
VERTICAL

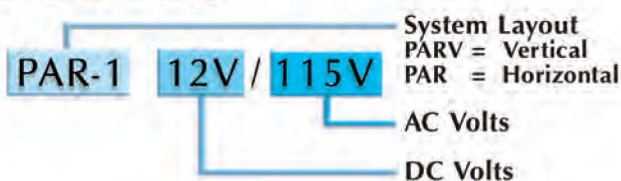

PAR-1
HORIZONTAL

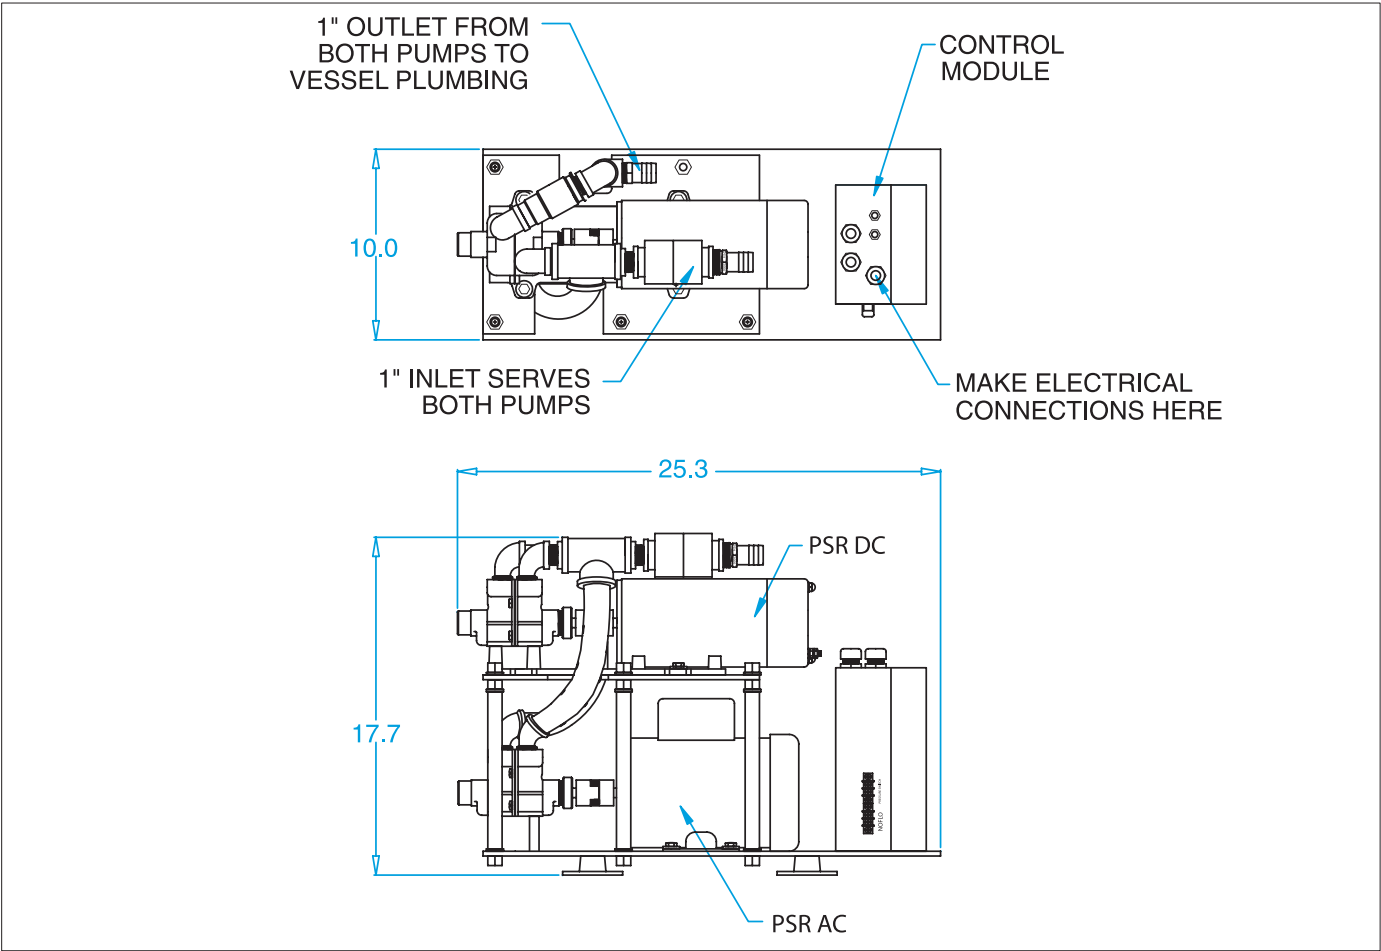

Big yachts demand big performance, and require on-line full-time back up for all systems. Parallelagon answers the call with the first system to provide uninterrupted operation, regardless of whether AC or DC voltage is present, and without operator interface when the input voltage changes from AC to DC, or from DC to AC.

- ▶ Includes one AC Paragon Senior pump and one DC Paragon Senior pump to deliver 11 GPM, regardless of input voltage.
- ▶ System control decides which pump to operate based upon available voltage.
- ▶ One pressure control for both pumps
- ▶ Patented NOFLO dry tank protection system protects both pumps
- ▶ Simple installation - one inlet, one outlet
- ▶ Inlet strainer and oil filled pressure gauge
